

Basic cleaning in cleanrooms – a job for professionals!

After a **new build, reconstruction, maintenance, product change or incident**, our experts provide a complete deep clean to ensure that your cleanrooms and associated systems reliably meet the limit values in accordance with EU GMP guidelines and DIN EN ISO 14644.

We can also realise **short-term assignments** for you 24/7 thanks to a team of up to 40 cleaners working 365 days a year.

We work exclusively with the most **professional cleanroom equipment and 100% of our own specially trained employees.**

Your benefits at a glance

Qualified expert staff

All our cleaning staff are qualified in our own cleanroom academy under real cleanroom conditions

Audit-proof documentation

Cleaning documentation and, if applicable, documentation of anomalies in the cleanroom with regard to critical points & defects (silicone joints, loose sockets, etc.)

Experience & Know-How

With 40 years of experience, we guarantee the highest level of quality, safety, adherence to deadlines and reliability

Resources & core tasks

No more problems with staff absence. Your employees can focus on their core tasks and production
